

INTERNSHIPS for  
Engineering Science and  
Architecture students

INTERNSHIPS for  
Engineering Science and  
Architecture students

## AY 2022 – 2023 What is new?

### Internships and students..

- ✓ Internship assignment (scientific-technical, strategic, business economics) is in line with the activities of an engineer (-architect) (*burgerlijk ingenieur*) within the company or organisation.
- ✓ On a voluntary basis or as part of the curriculum.
- ✓ If part of the curriculum: the internship has a duration of (minimally) 200 hours\*, of which 20 hours may be spent on writing the report.  
\*different from the former division into short (at least 4 weeks) and long (at least 6 weeks) internships.
- ✓ As one consecutive period or in several blocks.
- ✓ Preferably during the period July-September, but also (partly) outside of that period is possible\*.  
\*by moving away from an internship duration in weeks, internships can be filled in and organised in a more flexible way.
- ✓ At home or abroad.
- ✓ Unpaid (with or without an expense allowance) or paid.
- ✓ At the workplace under the supervision and follow-up of a company internship mentor and an academic supervisor.
- ✓ Students keep a concise logbook.
- ✓ Students write a final report (no later than 2 months after the end of the internship, between 4000 and 10000 words and separate from any master's thesis in the company).

**The Faculty of Engineering and Architecture is grateful to companies and organisations for their commitment and confidence in its students!**
